Product Engineering Technician, Seating Division

With 140 successful years in the industry, **Krug** is well recognized as a leader in the design & manufacture of high quality business and healthcare furniture. We have an immediate need for a Product Engineering Technician to work with our engineering team at our Seating Division in Kitchener, reporting to our Assistant Engineering Manager.

If you are a high-energy hands-on self-starter who is motivated, and a strong driver of change and improvement, team-oriented, with strong communication and people skills who thrives in a fast-paced demanding work environment that is subject to ongoing transformation this is the ideal opportunity for you!

- Create and maintain assembly, part, and jig/fixture, tooling and purchased component drawings for new and existing products, including Specials (customer-requested modifications to existing product).
- Create and Maintain Item Masters, Bills of Material, CNC programs, Routing Process Sheets and Installation Instructions.
- Performs first-off verification for newly created or revised CNC programs
- Assist Product Design in the development of new product by involvement in the pre-engineering stages, when required.
- Perform product cost estimating and analysis for regular product, specials and Engineering changes when required, seeking cost-reduction opportunities
- Create and maintain drawings for machine layouts when required
- Organize and maintain a file management system for CAD, CNC programs, spreadsheets and word processing files.
- Deal directly with suppliers to arrange specifications and ordering samples of purchased components as it relates to the engineering and development process.
- Perform product updates and other Engineering changes (E.C.N.) when required.
- Prepare and maintain database of Product Specifications for Customer Service uses.
- Support production personnel to ensure engineering information and changes are effectively communicated to the shop floor.
- Assists in supporting shop floor for quality and manufacturing related problem solving.
- Other support for Customer Service, and Field Support inquiries

REQUIREMENTS:

- Graduate of 3-yr Woodworking / Manufacturing technology/ Design/ Engineering program or equivalent
- Computer skills required in SolidWorks, AutoCAD, CNC Programming (Bsolid), Outlook, MS Word, and Excel. Experience in MRP environment
- Sound knowledge of various types of woodworking production equipment will be an asset
- Prior experience with wood, steel, foam, plastic, upholstery components will be an asset

In return, we offer a competitive compensation and benefit package, as well as the opportunity to work with a great team of people!

Please apply in confidence through HR, Indeed or LinkedIn.
