Engineering Supervisors

With 140 successful years in the industry, **Krug** is well recognized as a leader in the design & manufacture of high quality business and healthcare furniture. We have a great opportunity for two Engineering Supervisors to work with our engineering and manufacturing team at our Caseloads and Seating Divisions in Kitchener, reporting to our Director of Engineering.

If you are a high-energy hands-on self-starter who is motivated, and a strong driver of change and improvement, team-oriented, with strong communication and people skills who thrives in a fast-paced work environment that is subject to ongoing transformation this is the ideal opportunity for you!

RESPONSIBILITIES:

- Supervise sub-departmental resources and delegate work accordingly
- Provide work schedules within the department and set the direction for each project.
- Coach and mentor junior staff members on engineering procedures and techniques
- Engineer new product designs and custom specials using Solidworks or Autodesk Inventor
- Productivity improvement and cost savings projects
- Co-ordinate engineering change notices (ECN) with inventory control, planning and production.
- Assist in testing, evaluation of parts, components, assemblies going into products.
- Researches improvements in use of materials and processes for production or sub-contracting of new and existing product and uncovers new sources of supply for new or alternative materials or processes
- Generate bills of materials and configure items in an MRP system
- Generate new or custom product cost estimates in Excel & Word
- Ensures team is following Engineering ISO procedures and policies
- Tracks and signs-off on employee overtime, vacation and absences
- Schedule CNC programs requests for new and existing products.
- Pursues and maintains regulatory standards with national and local code authorities, i.e., Underwriter Laboratories, C.S.A. , BIFMA, in conjunction with the Director.

REQUIREMENTS:

- Diploma in Woodworking/ Manufacturing Technology / Design /Engineering Program or equivalent experience.
- Minimum of 5 years of work experience in Product or Manufacturing Engineering.
- Experienced in cost estimation on large or small projects.
- Strong leadership, communication and interpersonal skills.
- Project management skills with ability to work on tight timelines.
- Strong attention to detail, analytical problem solving and effective decision making skills
- Proficiency in Solidworks or Autodesk Inventor as well as Microsoft Office.
- Experience in Continuous Improvement and Lean Manufacturing an asset.

In return, we offer a competitive compensation and benefit package, including a pension plan and profit sharing as well as the opportunity to work with a great team of people!

Please apply in confidence on Indeed or LinkedIn.

We thank all applicants and advise that only those selected for an interview will be contacted.

Krug is an Equal Opportunity Employer.
